

Canada small transportable sawmill

Canadian professional mini sawmill easily transportable, easy operating and can be used by one person alone. Can saw logs up to 50 cm diameter * and 3.6 m length and much more with extensions. A sole man can saw up to 40 boards of 1.8 m x 60 cm x 3 cm by hour with the J 200. It can be fixed rapidly and almost anywhere because it does not require a level ground. Our cut system is innovative with vertical cut, reducing the wood pressure on the blade which produces less heat and reduces the risks of breaking the blade. Our equipment is precise and can make pieces of wood of 1.6 mm thickness. It's run with gas and meets Canadian and European Union standards. This heavy-duty and reliable mini sawmill is widely used in Canada which is an important wood producer.
